

CarouselUSA

Corporate Fact Sheet

Company Name:	Carousel USA
Founder/CEO:	John E. Thomson
Employees:	45
Company Profile:	Designer, manufacturer and installer of commercial and residential turntables, lifts, parking sliders and other solutions for parking and varied applications.
Background:	<p>Carousel USA is recognized as a world leader and innovator in the revolving machinery industry. Having designed, built, and installed thousands of revolving custom turntables for scores of commercial, residential, and military applications in North America, Canada, Mexico, Europe Middle East, and Japan, CUSA is at the forefront in technology and design for the most cost-effective solutions for varied problem-solving applications.</p> <p>Carousel USA was established in 2004 by John Thomson, who launched the company in response to his own need for an at-home parking solution.</p> <p>Carousel USA's turntable steelwork is designed using state-of-the-art 3-D CAD software by a staff of engineers and designers. With the exception of a short list of minor appendages, 100% of the turntable build is completed at the factory in Fontana, CA. Carousel USA uses the finest materials and components available today to build its turntables, including the exclusive use of Allen-Bradley electronics, a combination of Japanese and U.S.-made bearings, as well as NORD® motors and gearboxes manufactured in Germany. Carousel USA prides itself on quality and durability.</p>
